MAE ART

Avant-garde Art Gallery with Neosurrealist works by the artist Mae Marcelo Elías. Located in the city of Tucumán, Argentina since 2010. It shows us a different aesthetic based on the Abstract and figurative with non-intimate works and with a futuristic projection.

He proposes the human being with his particular worldview in front of the universe. Not aligned with religious or political trends, exposing Man to what is coming as an individualist being who expresses his own emotions and feelings.

ESTHETIC

The neosurrealist art of Mae Marcelo Elías has a solid base in the figurative and abstract. A color palette that makes an impact, determining the style and technique of someone who has a futuristic look at what he develops.

He usually uses warm colors and a wide gamma when mixing these on the surface.

Each work has 3 or 5 base colors and from there its decomposition, giving it the desired sense of what it wants to convey with its technique.

Colors are decisive in differentiating the artist's work and putting him at the forefront with his aesthetic proposal.

LEGACY

Transcend with his art within a capitalist world without losing that essence of originality.

Base each stroke to give a real and sincere meaning to his work to be part of the artistic legacy in his homeland and that it lasts over time.

That his style be distinguished as within the Neosurrealist current as unique and unrepeatable achievements where the aesthetic and exotic of his paintings make a difference with an important legacy

NEOSURREALISM

In his work he represents a psychic automatism where he tries to express the real functioning of thought through artistic intervention without the regulating participation of reason, being oblivious to any aesthetic, style or technical concern.

STATEMENT

His art consists of projecting himself as a human being in his own worldview marked with a style and technique that always seeks originality in order to show a futuristic world within the Abstract Surrealist or Neosurrealism.

CONTRIBUTION

Contribute with his work to global culture, with the artistic side being relevant to his paintings beyond the materialistic sense.

That each person or institution that acquires a painting knows that they are contributing in good law to an artist who has been a professional for 11 years, this being his only way of life and expression.

The main objective is to stay on time and work hard to improve and refine your technique year after year.

On December 28 of that year, he created ECIRA Independent Cultural Spaces of the Argentine Republic, a non-profit organization where he helped spread emerging artists locally and nationally. It comes to gather 150 volunteers who open new cultural spaces, popular libraries, everything is done without state funds, the members contribute selflessly to these undertakings. These actions, as expected, cause a break with the official entity and in October 2022 ECIRA INTERNATIONAL is established, managing to gather a global platform with 60,000 members who share the same concept but to the whole world, help the artists who come behind and support those who are at the forefront. The ECIRA process has 43 events in Argentina and 12 global events of great acceptance.

If there is something that characterizes the art of this Mae Marcelo Elías, it is his look to the future and that his works and cultural actions endure over time.
